GRADUATE MINING ENGINEER

Open Cut Coal Mine

The Company

Ensham Resources is an independently owned coal mine 40km east of Emerald in the Bowen Basin. Four draglines are the core of the open cut operation which produces over 7 million tonnes of thermal coal per annum. An underground operation is currently in construction phase.

Our aim is to develop you into a future leader with all requisite skills. Ensham provides a fantastic learning and growing environment in which you will be encouraged to take on accountability while delivering results. You will be doing real work within a lean Technical Services team.

The Job

Through scheduled rotation you will:

- Gain exposure to all Mine Planning functions (Drill and Blast, Draglines, etc)
- Learn to use and apply all the latest mine planning software
- Gain equipment operating skills
- Gain front line leadership experience
- Be provided the opportunity to spend time in both open cut and underground operations
- Learn about Contractor Management

The Person

To secure this position you will need

- a commitment to safe work practices
- tertiary qualifications in a mining engineering
- strong planning and analytical skills
- Good interpersonal skills
- able to operate within a team

Persons interested in pursuing this role are invited to forward applications to the address below or email to recruitment@ensham.com.au
